13.	Brunei Darussalam	For non-residents and holders of the working permit, Brunei Darussalam's border is only opened for essential and official travels, subject to the Prime Minister's Office's approval.	Brunei has yet to specify types/brands of vaccines recognised by the country. At the moment, the vaccines that are currently being used by the country are: <ul style="list-style-type: none"> • Pfizer • Sinopharm • Astrazaneca • Moderna 	<p>At present, Brunei Darussalam is facing the second wave of the COVID-19 outbreak in the country, which sees an increasing number of local cases daily. To tackle the rapid spread of the virus due to the presence of the Delta Variant, Brunei Darussalam has re-imposed stringent regulations and rules, including border control mechanisms. Brunei Darussalam has also introduced a curfew from 8.00 pm to 4.00 pm in a bid to tackle the pandemic. At the same time, Brunei Darussalam is currently intensifying efforts to inoculate its population after the contribution of vaccines from Singapore, China, Japan, and Australia.</p> <p>Given the recent COVID-19 developments in the country, it is likely for Brunei Darussalam to prolong the currently imposed rules and regulations, including border closure and the quarantine period. Currently, the mandatory quarantine period for travellers arriving from abroad is 14 days. Home quarantine is only given to the diplomatic community, and the quarantine period is within 7 to 14 days, subject to the risk assessment by the Ministry of Health.</p>
14.	Bulgaria	Yes	<ul style="list-style-type: none"> • Comirnaty – Pfizer; • Moderna; • Vaxzevria – AstraZeneca • Janssen – Johnson & Johnson 	<p>Access is permitted only for those vaccinated with a vaccine recognized by EMA (European Medicines Agency), as Pfizer, Moderna, Astra Zeneca or Johnson & Johnson and to whom at least 10 days have passed since the second dose vaccination with Pfizer, Moderna and Astra Zeneca or after 28 days for the Johnson&Johnson single-dose vaccine as well as for those confirmed positive for COVID infection in the last 180 days.</p>

36.	Germany / Frankfurt for the state of Hessen / Frankfurt)	Border open to vaccinated, tested or reconvalescent Malaysians	Comirnaty COVID-19 Vaccine Janssen Spikevax (formerly known: COVID-19 Vaccine Moderna) Vaxzevria (formerly known: COVID-19 Vaccine AstraZeneca)	<p>As of 01.10.2021, Malaysia is still considered high risk. All travelers over the age of twelve must present negative proof of testing, vaccination or convalescence upon entry.</p> <p>Persons who have stayed in one of the above-mentioned risk areas (high-risk or virus variant area) in the last 10 days before entering the Federal Republic of Germany must observe certain rules:</p> <p>Obligation to register: After previous stay in a risk area passengers are obliged to fill out the digital entry registration at https://www.einreiseanmeldung.de and to carry the confirmation received with them upon entry. New risk areas will appear on the digital entry notification at midnight each effective date. The confirmation is checked by the carrier and, if necessary, additionally by the Federal Police as part of border police duties.</p> <p>Special requirement:</p> <p>After prior stay in a high-risk area, travelers must carry proof of testing, vaccination, or convalescence. In the case of prior stay in a virus variant area, only test proof is possible.</p> <p>Proof must be uploaded via the Digital Entry Application upload portal at https://www.einreiseanmeldung.de/#/. Travelers should use the individual link on the registration confirmation (PDF document) for this purpose.</p> <p>Quarantine obligation: Persons who have stayed in a risk area must generally go home immediately after arrival - or to other accommodation at the destination - and seclude themselves for ten</p>

73.	Norway	No	Comirnaty (BioNTech / Pfizer) and Spikevax (previously COVID-19 Vaccine Moderna) ²	<p>There are limitations as to who is allowed to enter Norway from grey countries outside the EEA, Switzerland and the United Kingdom. Malaysia is in the grey list.</p> <p>If the travellers are allowed to enter Norway, the following rules will apply:</p> <ul style="list-style-type: none">• The travellers must fill in the travel registration form for entry to Norway. The digital registration form can be completed no earlier than 72 hours before entry.• The travellers must take a test upon arrival. This is a rapid antigen-based test, and the travellers will have to wait at the test centre until the result is available. Some exemptions apply:<ul style="list-style-type: none">▪ If there is no test centre at the point of entry or the test centre is closed, the travellers must get tested within 24 hours of entry. The travellers can get tested at a public test centre in the municipality the travellers are staying in. The test can still be a rapid antigen test.

² The COVID-19 vaccine Vaxzevria from AstraZeneca was used in Norway until 11 March 2021. It was removed from the Norwegian COVID-19 immunisation programme because of rare but serious vaccine side effects in the form of low platelets, blood clots and bleeding. Following a review and evaluation of available data and the situation in Norway, the Norwegian Institute of Public Health published a recommendation on 15 April 2021 that the AstraZeneca vaccine should be removed from the national immunisation programme. The Government decided on 10 May 2021 that the AstraZeneca vaccine will not be used in Norway and will be removed from the COVID-19 immunisation programme.

Janssen-vaccine was conditionally approved by the medicine's authorities on 11 March 2021 but has not been used in the coronavirus immunisation programme in Norway. Following a recommendation from the Norwegian Institute of Public Health, the Government has decided that the Janssen vaccine will not be used in the COVID-19 immunisation programme based on the current situation in Norway, due to the risk of rare but serious vaccine side effects in the form of low platelets, blood clots and bleeding.
